Brooklyn, NY | 929-561-1319 | dyang32@binghamton.edu | <https://github.com/dyang21> | <https://dyang21.github.io>

EDUCATION

Binghamton University, State University of New York, Thomas J. Watson School of Engineering and Applied Science

Bachelor of Science in Computer Science

2019 - 2023

TECHNICAL SKILLS

Certifications: CompTIA Security+, AutoCAD Certiport Certified 2017, OSHA 10-Hour Construction Safety and Health

Languages: Python, C++, SQL, C, C#, Bash, Powershell, Javascript, HTML5, Basic CSS3

Tools & Software: Kafka, Jenkins, SQLite, Flask, WireShark, pfSense, AutoCAD, MS Office Suite

Platforms: Linux, UNIX, Windows, VMWare vSphere 6/7

Container Orchestration: Docker, Kubernetes

Server Management: EOL transitions, patching, upgrading, troubleshooting

Data Integration & CI/CD: Data pipelines, Jenkins automation

PROJECT EXPERIENCE

Continuous Data Integration/Deployment System (CDIS), Independent Developer

June 2023 - August 2023

- Designed a comprehensive data pipeline for sensor data, from simulation to visualization.
- Leveraged Kafka for robust data transmission; stored data in SQLite for lightweight application purposes.
- Achieved system scalability and efficiency by implementing Docker for microservices and Jenkins for CI/CD automation.
- Integrated Kubernetes-based unit tests, ensuring system integrity.
- Built a Flask app for seamless data visualization.

ZoomEase, Developer

July 2023 - August 2023

- Overhauled, cleaned, and optimized application code, including the integration of C#'s built-in functions, refined error-handling, and removal of redundant logic.
- Introduced a consistent method for HTTP client response evaluations, leading to a significant reduction in error occurrences and a more reliable user experience.

Virtual Home Lab, Independent Administrator

October 2020 - August 2021.

- Established GPOs and a centralized file server, streamlining device management and ensuring secure, convenient data storage.
- Enhanced overall network security with VLAN segmentation, effectively reducing potential attack vectors.
- Seamlessly integrated pfsense LDAP with Windows DC, promoting a robust, secure AD login mechanism.
- Deployed Pi-Hole domain-wide, speeding up web browsing, minimizing ads, and bolstering domain name resolution through a recursive DNS.

Lost In Space (Platformer), Independent Developer

October 2019 - December 2019

- Spearheaded both the backend and frontend development of a Python-based side-scrolling game using Pygame, seamlessly integrating game physics, player dynamics, and the overall game loop.
- Achieved 3rd place among nearly 30 teams by crafting an engaging player experience with dynamic platforms, a time-based scoring metric, and a cohesive game loop structure.

PROFESSIONAL EXPERIENCE

Deltek, System Administrator Intern

June 2022 - August 2022

- Orchestrated the EOL transition for remote Windows Server 2012 R2 systems, coordinating decommissioning, in-place upgrades, and VM requests to ensure continuous service.
- Fostered clear communication and collaboration by devising a transparent strategy, utilizing detailed emails and collaborative discussions, enhancing user understanding and cooperation.
- Received recognition for exceptional customer service and effective communication, which streamlined server management procedures and increased user satisfaction.
- Drafted in-depth documentation on Windows Server 2012 R2 EOL transition and conducted team training sessions.

Tottenville High School, Technical Aide

June 2019 - July 2019

- Installed Mac/Windows operating systems and printer drivers, streamlining computer setups for school use.
- Assembled and set up computers with the necessary cables and hardware, ensuring students had functional systems.
- Configured and optimized networking equipment, facilitating stable Ethernet connections for improved connectivity.

RELATED EXPERIENCE

Google Tech Challenge 2019

September 2019

- Secured 1st Place among campus teams in coding speed-runs and puzzles.
